INTRODUCTION

In making up our 1932 price list we are offering several worth-while varieties which we have not catalogued before. We think that you will find each one good in its class.

We would advise all to order early as our supply is limited on several of the kinds listed. Each fall more and more people order when they can see the blooms. Last fall our orders were nearly double that of any fall before, consequently our stock is much reduced for our spring sales, regardless of the large crop which we harvested last fall.

Owing to our large crop and the general drop in prices we have been able to reduce the price on several varieties since last fall.

We wish to state that those of our customers who ordered last fall for spring delivery will benefit by this drop as well as those who order this spring from the price list.

Please notice our page of Garden Books listed. Through one of the publishers of Horticultural books we are able to offer you these books at the prices quoted and think you will find them well worth the price asked.

We are always glad to have those interested in flowers visit our garden during the blooming season.

R. D. DANIELS & SON.
